Year 1 Course:

The Year 1 EMG course is carefully designed to advance our students beyond the school curriculum, and elevate them to the high academic standards we aim for at Pre-Uni. As well as getting ahead in reading comprehension and numeracy, students will be introduced to new general ability modules, which build a strong foundation for Thinking Skills.

EMG Course

Due to the nature of our advanced curriculum, this course will require a significant weekly commitment to module work in English, Maths, and General Ability.

English : lessons will focus on reading skills, spelling, vocabulary, comprehension, and sentence formulation.

Maths : lessons will involve various mathematical theories and principles. Topics include addition, counting, money, time, shapes, and more.

General Ability : lessons will cover basic verbal reasoning concepts and skills.
