Year 3 Course:

The Year 3 WEMT course is carefully designed to prepare students for the high academic standards expected at this stage of their education. As well as getting ahead in writing, reading comprehension, and numeracy, students will be introduced to a new thinking skills component, which builds a solid foundation for the updated OC and Selective High School Placement tests.

WEMT Course

Due to the nature of our advanced curriculum, this course will require a significant weekly commitment to module work in English, Maths, and Thinking Skills.

Writing modules teach the most efficient methods for organising and structuring writing tasks, with a focus on developing critical thinking and reasoning skills.

English : lessons will focus on reading skills, comprehension, and answering multiple-choice questions.

Maths : lessons are essential for developing a thorough understanding of mathematical theories, principles, and formulas.

Thinking Skills : lessons will cover a variety of practical, challenging, and stimulating questions in mathematical reasoning, problem solving, and critical thinking.
