Year 4 OC Trial Test Course:

The Year 4 OC Trial Test Course (OCTTC) is a comprehensive program designed to prepare Year 4 students for the OC Placement Test. The course reflects the format, timing, and conditions of the actual OC exam. Our students are taught to manage their time efficiently, minimise errors, overcome exam nerves, and perform at their optimum level.

Students will attempt a trial test each week and subsequently review the questions + solutions with our teachers, focusing more heavily on the difficult questions. Students' test results will be available on Cyberschool immediately after each session.
